

# BUILD FASTER FOR THE AI BOOM

Throughput booster  
for HVAC and cooling OEMs

# Don't let forklifts limit **your** throughput

The data center boom doesn't pause between production stages. If your line is waiting for a forklift, your throughput is capped.

**MasterMover®**  
Electric Tugger Solutions

Traditional forklift & crane moves	VS	PowerSteered movement
⊗ Waiting for lifting equipment between stages		✓ Continuous flow between build stages, no waiting
⊗ Shunting & pulsing loads to inch into position		✓ Remote control for maximum precision & visibility
⊗ Wide turns & poor positioning in tight bays		✓ Omni-directional movement in confined spaces
⊗ More touchpoints = more risk to units		✓ Smooth, controlled moves to protect equipment
⊗ Throughput depends on forklift availability		✓ Move up to 154,000 lbs. and beyond!

# PowerSteered tuggers **keep** **your line moving**

Ultimate precision for large, high-value load moving that keeps up with demand. Combine machines with MultiLink technology for even more power and accuracy.

Safer,  
cleaner  
equipment

SYNC  
multiple  
machines

No licence  
required

Remote  
control

Precision  
positioning

Easy to  
Operate

Move up to 154,000 lbs.  
**OR MORE!**

# Unlock non-stop material flow

Heavy, high-value units need to be moved through tight production spaces without risk or delay.

## Boost throughput

Remove forklift waiting time and keep products flowing continuously through production stages.

## Total maneuverability

Omni-directional movement for precise positioning at test stations and assembly lines to dispatch.

## Reduce risk

Smooth, controlled movement with more visibility and fewer handling steps, minimal risk of damage to high-value units.

# You're in good company

We help manufacturers move

- ✓ Chillers
- ✓ HVAC units
- ✓ CDUs
- ✓ Energy enclosures
- ✓ HDUs
- ✓ Gensets
