

MasterMover®

Pharmaceutical Manual Handling Solutions

Maximise uptime. Optimise resources.
Boost safety.

Your cleanroom equipment moving partners

Engineered by industry experts, trusted by industry leaders.

From buffer containers to chromatography columns, electric tugs allow quick reconfiguration of process trains and cleanroom suites – taking on awkward material movement in confined spaces to boost uptime and free up staff to focus on value-added work.

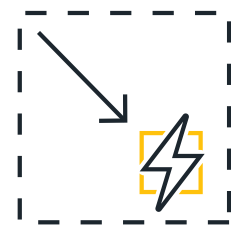

- Buffer and media totes
- Bioprocess containers
- Chromatography columns
- Single-use mixers and skids
- Reactors and agitators
- Vessels and tanks

MasterMover

Compact solutions for pharmaceutical manufacturers

Maximise suite uptime and create flexible processes without compromising on safety.

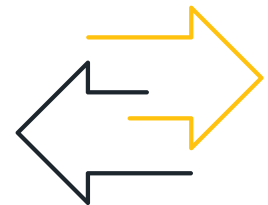

Precise movement

Compact electric tugs designed for tight, challenging spaces.

Eliminate manual handling

Reduce injury risks and boost productivity.

Maximise uptime

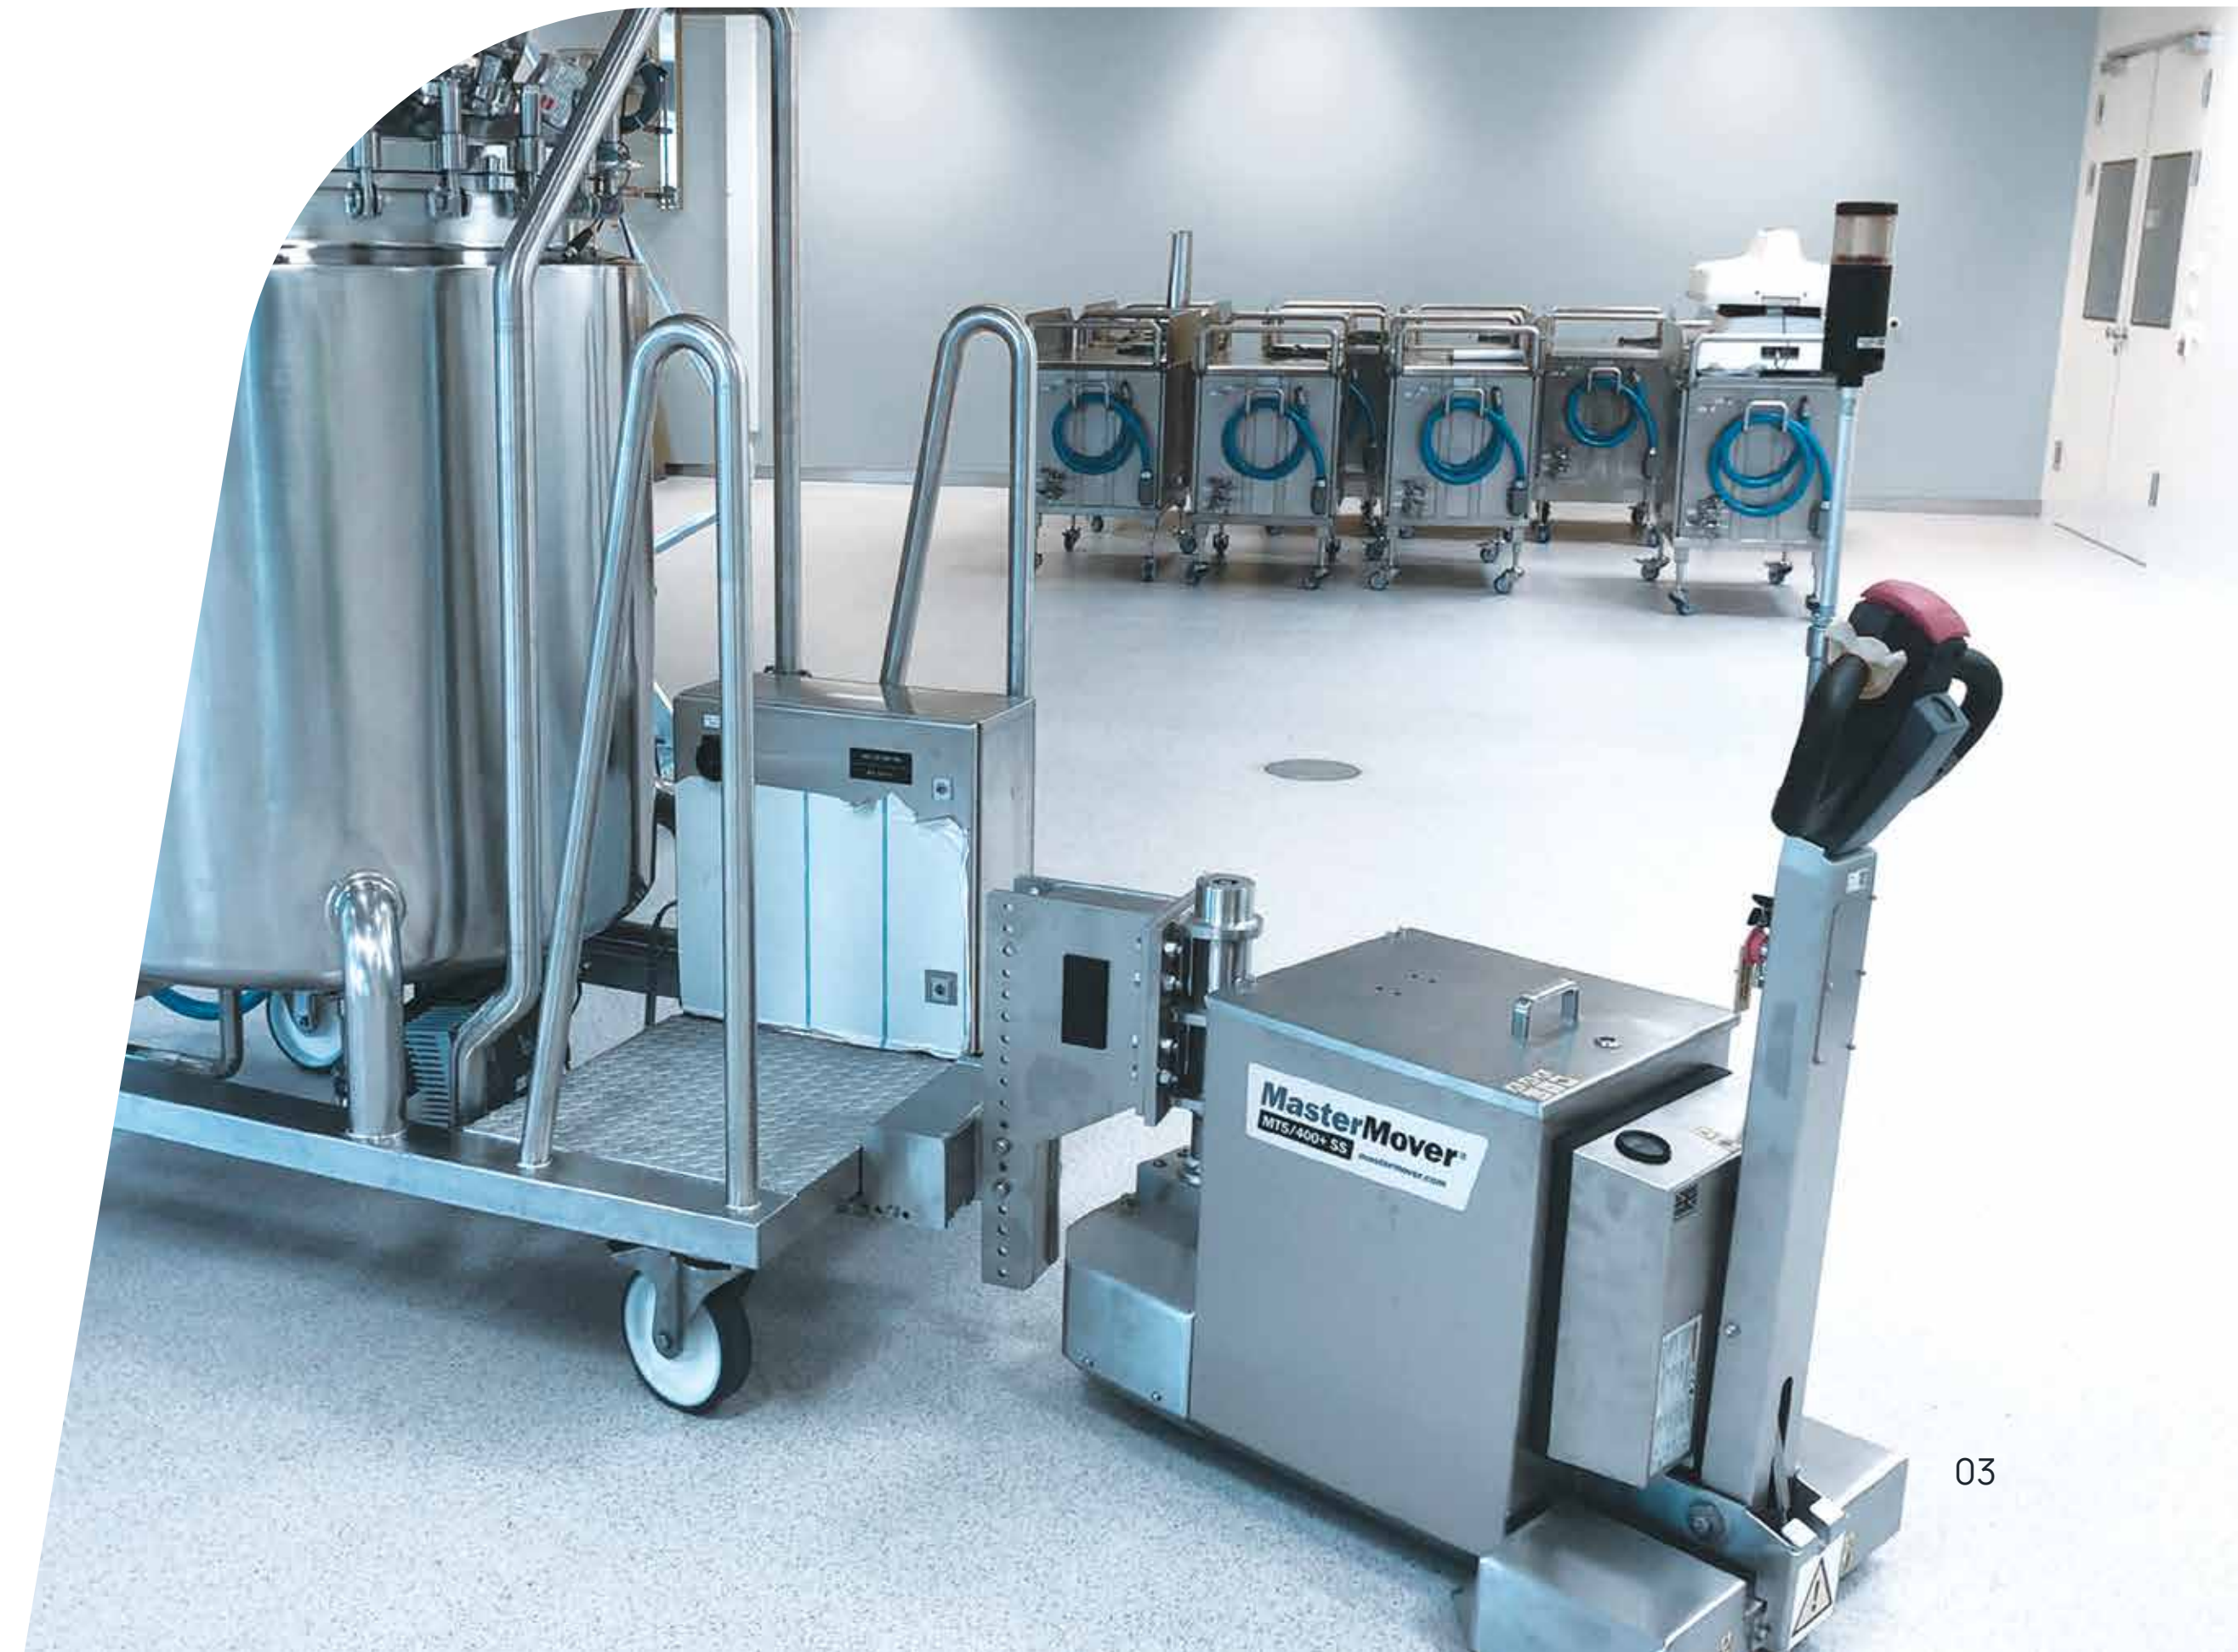

Unlock flexibility for suite and process train reconfiguration.

Cleanroom approved

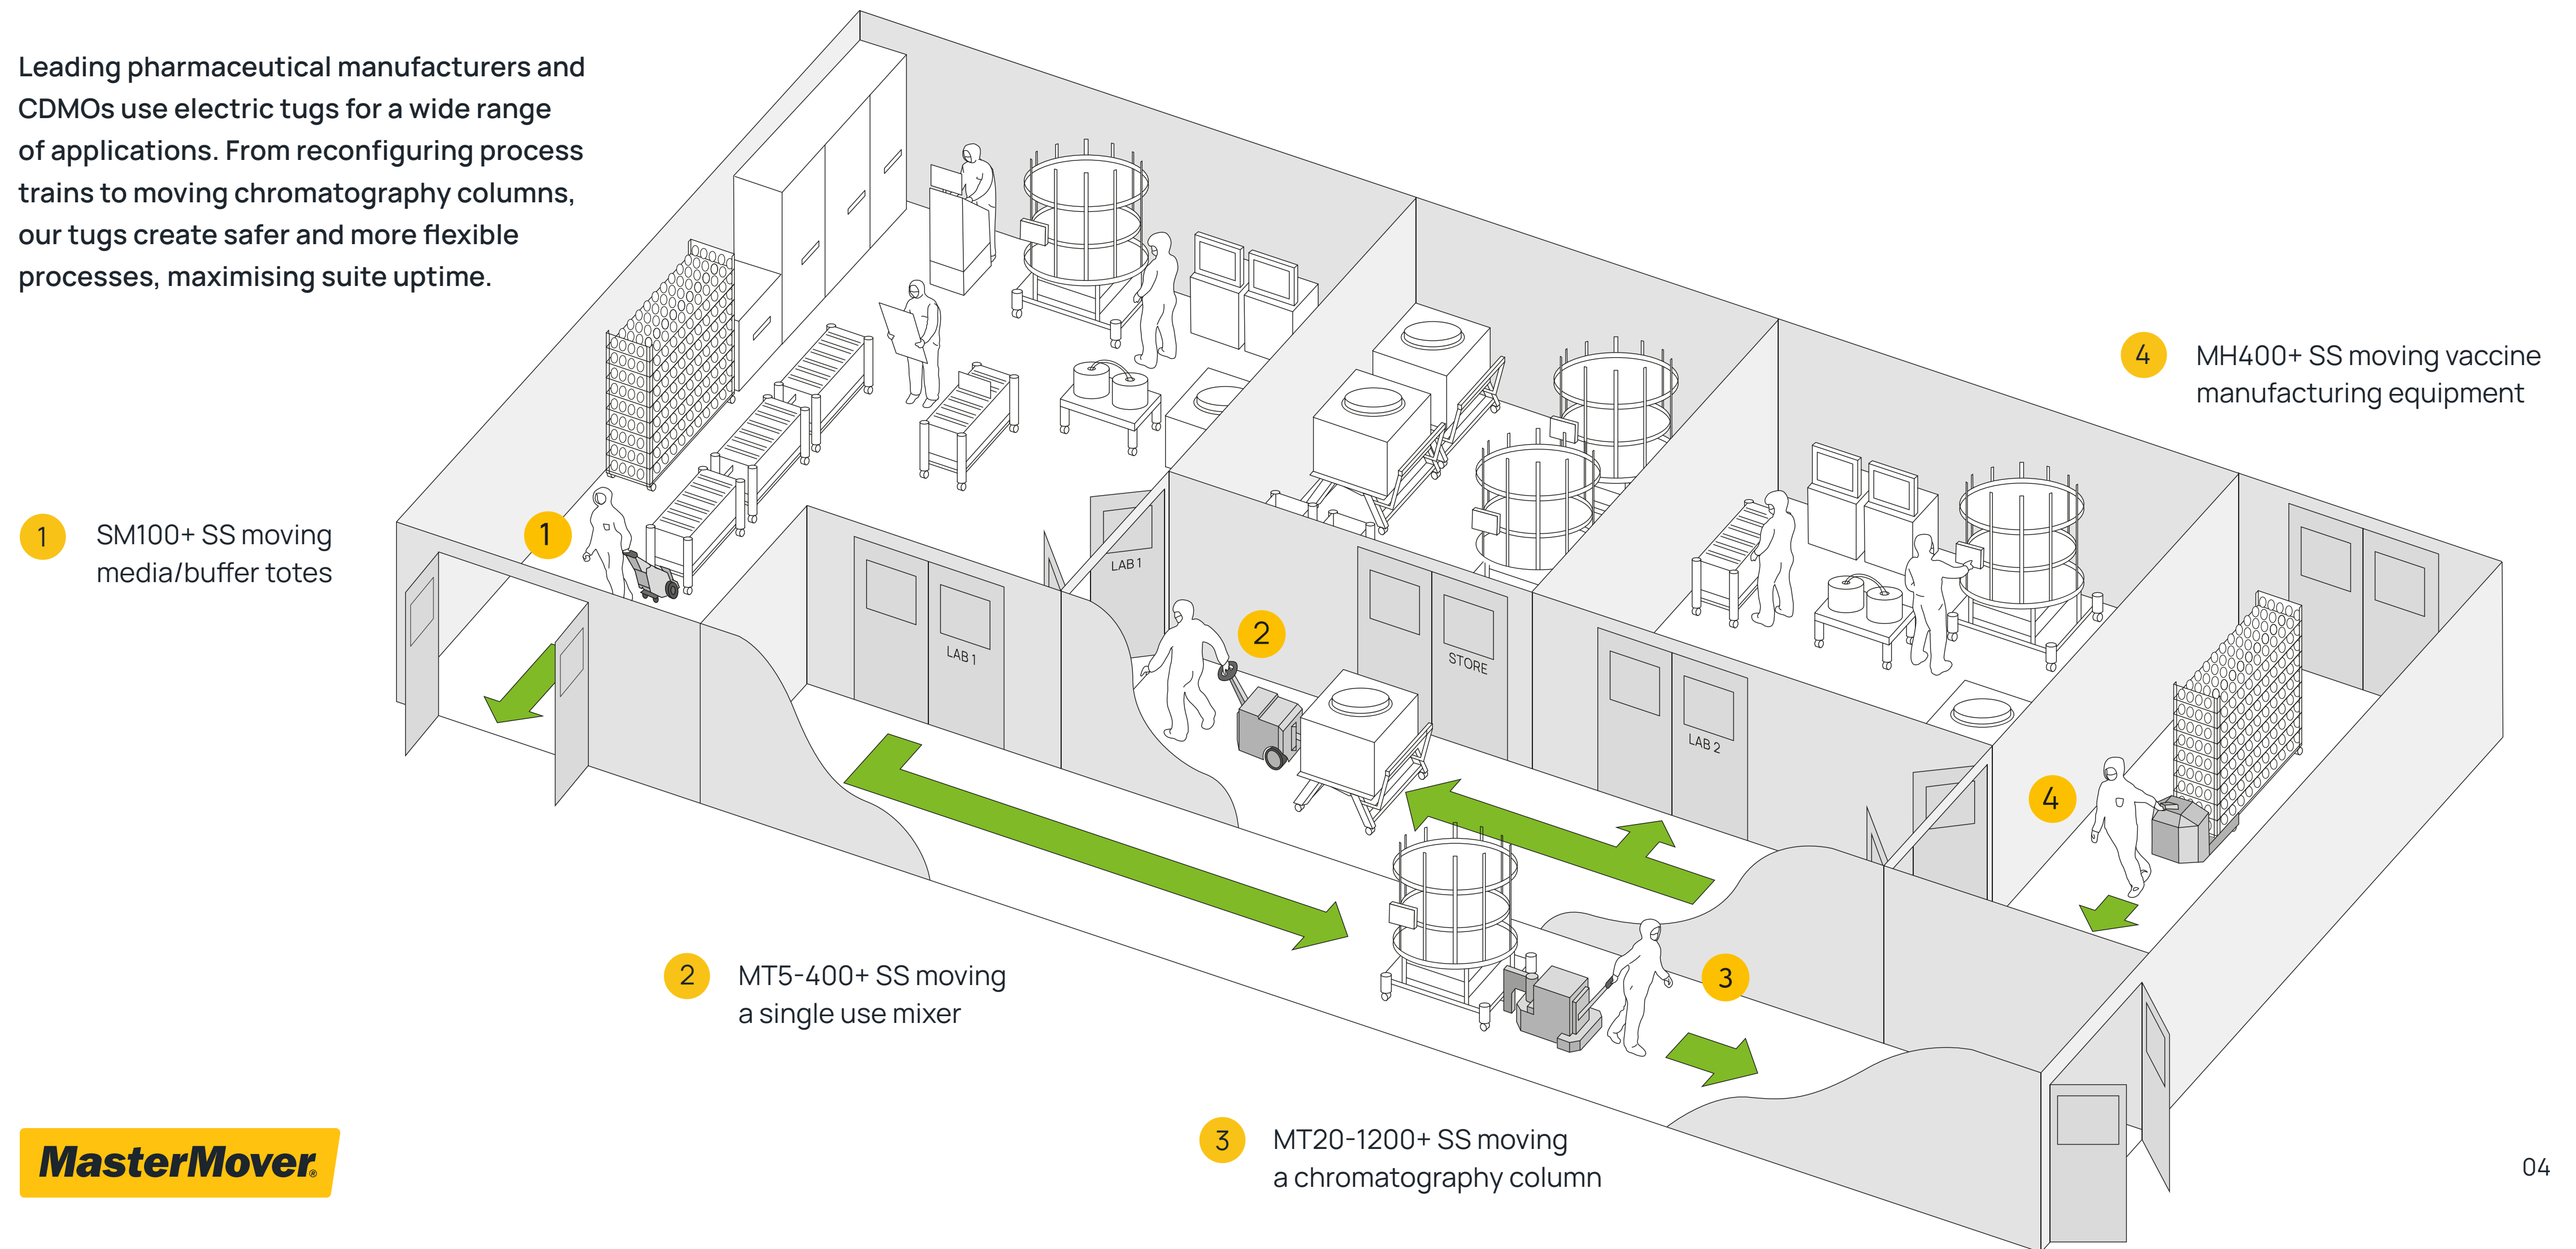

High-grade 316 stainless steel and rated from IP42 to IP55.

MasterMover

Typical applications in cleanroom suites

Leading pharmaceutical manufacturers and CDMOs use electric tugs for a wide range of applications. From reconfiguring process trains to moving chromatography columns, our tugs create safer and more flexible processes, maximising suite uptime.

Purpose-built IP and stainless steel solutions

Remove manual handling and boost operational efficiency with high-power electric tugs designed for use in sterile environments. Safely and precisely move loads up to 15,000kg even in confined or challenging spaces, with automatic braking for maximum security of high-value loads.

SmartMover

Weight capacity: Up to 2,000kg

Small but powerful to eliminate manual handling.

MasterTow

Weight capacity: up to 3,000kg

Simple coupling systems for a range of equipment.

MasterHandler

Weight capacity: up to 4,000kg

Versatile power. Perfect for moving mixers and columns.

MasterTug

Weight capacity: up to 15,000kg

Heavy-duty towing for loads with drawbars.

Custom solutions

Purpose-built solutions, from heavier weight capacities to unique couplings. Get in touch to discuss your requirements.

Trusted by industry leaders

Pharmaceutical manufacturers globally are making the switch to safer, more efficient equipment movement with electric tugs.

Who we work with...

The logo for GlaxoSmithKline (GSK) in orange.The logo for AstraZeneca, featuring the name in purple and a yellow stylized 'Z' icon.The logo for Pfizer, featuring a blue stylized 'P' icon and the name in blue.The logo for Boehringer Ingelheim, featuring a blue circular icon with a building and the name in blue.The logo for Amgen in blue.The logo for WuXi Biologics, featuring the name in black and a blue and yellow stylized 'W' icon.

“High-quality, reliable, and easy to operate – and they offer fantastic control and movement in tight spaces so they are ideal for use in the biopharma industry.”

John O'Reilly
