

MasterTow series

✓ Industrial towing solutions to move up to 44,000 lbs.

The MasterTow series of powerful, easy-to-use electric tow tuggers can handle loads up to 44,000 lbs. Engineered for demanding environments, the MasterTow series delivers reliable towing performance - indoors, outdoors, and on slopes.

With intuitive operator controls and safety built-in as standard, the MasterTow series gives operators complete control when moving heavy loads. A simple yet robust coupling system guarantees load security during movement, and allows multiple loads to be linked and moved at once.

Benefits of the MasterTow series

Versatile solution

With a simple tow hitch system, the MasterTow is straightforward to deploy across a wide range of applications.

Indoor, outdoor, and on slopes

Built tough, the MasterTow delivers reliable performance in different environments.

Advanced technology options

Upgrade to Electric Steer models for remote control and automation options to maximize efficiency and scale fleets as your business grows.

- ✓ Easily move up to 44,000 lbs.
- ✓ Boost workplace safety
- ✓ Zero emissions
- ✓ Simple tow pin connection
- ✓ Easy-swap batteries for 24/7 operation
- ✓ Suitable for indoor & outdoor use
- ✓ Remote control & AGV options

Typical applications

Manufacturing & assembly

Safely and efficiently move heavy sub-assemblies, kitting carts, and WIP just-in-time across production floors without waiting for licensed drivers.

Aerospace & MRO

Tow engines, fuselages, wings, and ground support equipment through hangars and maintenance sites to minimize turnaround times.

Waste management

Easily move heavy dumpsters and eliminate manual handling for safer trash handling and improved productivity.

Key features

Safe by design

Integrated warning horn, two-speed selector, automatic braking, emergency stop system and an anti-crush button.

Range of power options

Choose from maintenance-free AGM batteries and lithium options for performance when you need it.

Simple tow pin connection

A plug-and-play hitch that works with a wide range of drawbars for quick and secure connection to the load.

Built tough

A solid, steel design delivers the reliability needed for tough industrial environments.

Stainless steel options

Safely move equipment in cleanroom environments with high-grade 316 stainless steel options.

Remote control & AGV options

Electric Steer models offer the option of remote control operation for maximum visibility, or automation solutions - giving you the flexibility to choose how your operation runs.

Advanced technology options

Move even more & scale your operations

Remote control

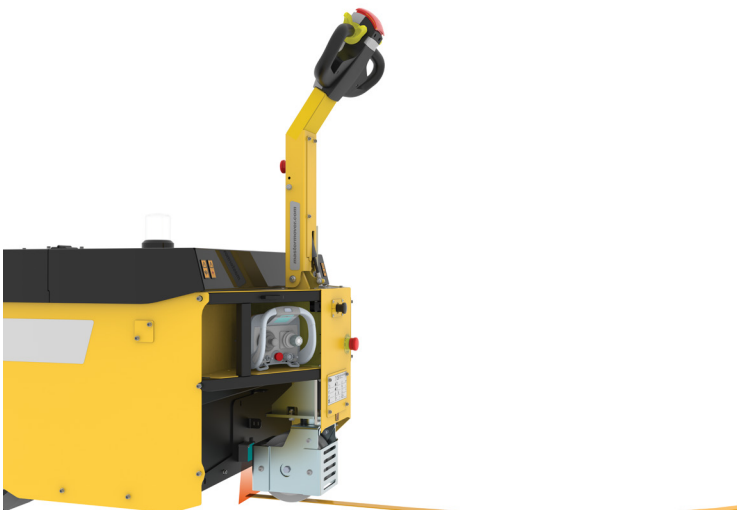

Remote control operation gives operators the freedom to maneuver loads from the optimum position - improving visibility, reducing risk, and keeping control simple and intuitive.

Wireless AutoSteer

An operator controls the machine speed via a remote whilst the machine follows a pre-defined line on the floor. Perfect for delivering accurate, repeatable movements, whilst maintaining operator control.

Line follow AGV

Fully automated solution. Following a predefined line on the floor, the machine navigates automatically. Safety scanners identify hazards, and bring the machine to a complete stop if an obstacle is identified.

In application

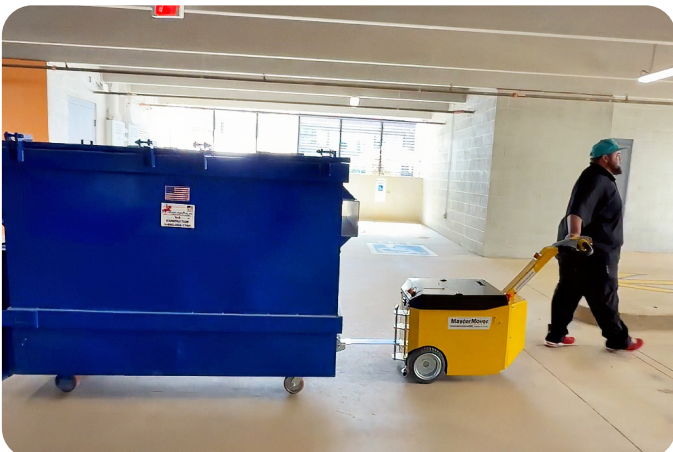

200% productivity boost for Manchester Airport Group with TOW300 tuggers

Material handling manpower reduced by 66.7%

100% reduction in lost-time incidents since installation

Elimination of manual handling for baggage trailer movement

MasterTow models

TOW200
Moves up to 4,400 lbs.

TOW1000 ES
Moves up to 22,000 lbs.

TOW300
Moves up to 6,600 lbs.

TOW1200 ES
Moves up to 26,400 lbs.

TOW600
Moves up to 13,200 lbs.

TOW1500 ES
Moves up to 33,000 lbs.

TOW600 ES
Moves up to 13,200 lbs.

TOW2000 ES
Moves up to 44,000 lbs.

TOW800 ES
Moves up to 17,600 lbs.
