

MasterMover®

Worldwide Electric Tug Solutions

What could we move for you?

Benefits For Articulated Trailer Manufacturers

- Increased efficiency through semi automating assembly lines
- Reduce downtime by enabling any trained operator to move a load
- Small footprint machines enable better use of production and warehouse space.
- Safe movement of loads through congested production environments
- Reduce capital expenditure by using fewer fork lift trucks
- Control and manoeuvrability enables you to move heavy and awkward loads more safely

Articulated Lorry Trailers | Tugs For Moving Articulated Trailer Chassis Through Production

The Trailer Moving System (TMS) tug from MasterMover is designed to allow a single pedestrian operator to move empty articulated lorry trailers, the perfect solution for companies involved with such tasks. Use of the compact tug reduces reliance on large and expensive shunter trucks and as the tug is battery powered, can be used inside without fear of diesel fumes polluting employee workspace.
