

Benefits For The Boat Building Sector

- Dramatic reduction in manual handling
- Safe movement of loads through congested production environments
- Increased efficiency through semi automating assembly lines
- Reduce downtime by enabling any trained operator to move a load – no more waiting for forklift or overhead crane availability!
- Reduce capital expenditure by using fewer fork lift trucks
- Small footprint machines enable better use of production area
- Control and manoeuvrability enables you to move heavy and awkward loads more safely using less man power

Boat Building | Load Moving Solutions For Boat Manufacturing And Assembly

MasterMover provides load moving solutions for all companies involved with boat building. The range of machines provides solutions for moving small trolleys to completed luxury cruisers through the assembly process. The compact units work well in congested areas and provide exceptional control over heavy loads.

- Fairline Boats
- Sealine International Ltd
- DML - Appledore Shipbuilders
