

Benefits For The Steel And Fabrication Sector

- Increased efficiency through semi automating assembly lines
- Reduce capital expenditure by using fewer fork lift trucks and overhead cranes
- Dramatic reduction in manual handling
- Enable delivery of components and materials 'just in time'
- Safe movement of loads through congested production environments
- Reduce downtime by enabling any trained operator to move a load – no more waiting for forklift or overhead crane availability!
- Small footprint machines enable better use of production and warehouse space.
- Control and manoeuvrability enables you to move heavy and awkward loads more safely using less man power

Heavy Load Moving Solutions For The Steel And Fabrication Industry

MasterMover provides pedestrian electric tugs to handle anything from heavy steel structures to small fabricated parts enabling a semi-automated production process to be used. These flexible handling solutions are being used by leading steel and fabrication companies around the world delivering significant savings through improved safety and efficiency. To see how we can help you simply send us an enquiry and we will send you our recommendations.
